DANCE: "It all started

when I was nine years

when I was nine years old.

I began with kathak before shifting to the contemporary style of dancing. I finished studying hotel management, but it didn't interest me. It was dance all along, though it took me awhile to convince myself. Once that was done, there has been no looking back."

is my existence now and people relate to me through it. Today I have so many students studying dance with me; they come from different backgrounds and lifestyles and are between 12 and 61 years of age. And to see that people have actually come out of their shells to do what they love is wonderful."

## TAAL OF SUCCESS:

"I strongly believe that everyone has a calling in life; for me, it was dance.

If I could make any contribution to the world, it would definitely be through dance."
